

DESIGN QUALITY INDICATOR

Formulating Design Quality: A Novel Approach

Thursday, January 21, 6:00 pm - 7:30 pm

History shows that poor building design results in high costs and low value for money. By capitalizing on the economic, social and environmental benefits of improved design, value and productivity can be increased. The Design Quality Indicator, new to the US but popular in the UK, offers a way to improve design. Marc Sallette, civil engineer turned real estate businessman, founded DQI Inc., LLC, to "capture the voice of all project stakeholders, quantify design intangibles, and validate the design of a building or space from start to finish." Learn more at this session.

This event is sponsored by Design and Practice Management KCs

Learning units: 1 LU

Location: AIA Chicago, 35 E Wacker Drive

Member price: 0 Non-member price: \$15.00
